

LYSAGHT® from Tata BlueScope Steel recognised

“Most Trusted Roofing Brand”

Tata BlueScope Steel’s LYSAGHT® Brand was awarded as **“Most Trusted Roofing Brand”** under **Construction category** by the **7th EPC World Awards** at a ceremony held on **20th December’17** at The Ashok, Delhi. This award is a result of the brand’s exceptional contribution towards infrastructure and construction sector with a focus on offering innovative and quality roofing solutions for progressive sectors across India.

Chosen by an independent panel of Industry experts; 7th EPC World Awards 2017 is focused and dedicated at generating holistic efficiencies across the entire spectrum of Infrastructure, EPC and Construction. The Awards have evolved as a national platform and is acknowledged as one of the most cherished industry recognitions in India.

“This hallmark from a renowned organisation is an acknowledgement of our product’s performance that is committed to deliver innovation and excellence. We strive constantly to offer products and solutions that empower our customers to do their business better. This award is a testimony of those efforts put in by our teams. Receiving this recognition is a reassurance, of us being one the most preferred and trusted building products partner within the construction fraternity.” Mr. Ajay Rattan, GM (Sales, Const. & Engg.) LYSAGHT® Business, on receiving the award.

LYSAGHT® has a strong legacy of over 150 years with various applications in prestigious projects across the globe. With an expertise in construction & engineering, the brand has provided roofing solutions for more than 30 million square meters in the span of 10 years in India. Some of the prestigious projects executed include stadium for Common Wealth Games, Delhi Metro Stations, Airport buildings, BRTS , Railway Stations for Eastern Railways, Manufacturing plants for Mahindra Vehicle, Cummins India Limited, Ford Motors and Apollo Tyres to name a few. A preferred choice of top architects within the country, these durable profiles offer design flexibility, thermal comfort and are available in a wide range of aesthetically superior colour palette. LYSAGHT® profiles are manufactured from high strength and superior quality raw materials such as COLORBOND® steel and ZINCALUME® steel, that make them an ultimate choice for rugged applications within the infrastructure and industrial segments.
