SMART CITIES

Strong credentials

Whether in cross-building, cross-regional or cross-system applications, Delta's intelligent building solutions and products help building managers achieve optimal efficiency in their daily operations and maintenance tasks, and enhance people's health and productivity. Since 2006, Delta has built 23 green buildings worldwide. The new Delta Americas headquarters building in Fremont, California, which has been certified as a LEED Platinum green building and is targeted to achieving the Net Zero standard. The new building is a solid example of adopting Delta Building Solutions and BMCS to improve building energy efficiency.

Bags ACREX Awards of Excellence

During the event, Delta was awarded the prestigious ACREX Awards of Excellence 2017 in the category "Innovation in Building Automation", which include the solutions of LOYTEC, a Delta Group company. Featured for its flexibility and compatibility with international communication protocols, such as BACnet, LON and others, Delta's Building Automation Solutions were recognised for excellence in integrating with building subsystems on a single IP-based management and remote control platform, which shortens the system integration period and achieves intelligent, energy-saving and high-efficiency buildings.

Robert Luor, General Manager of Delta's Building Automation Solutions Business Department, said, "We are honoured to be recognised by the ACREX Awards of Excellence. Our building management software offers an all-in-one platform that integrates control and equipment operation management, and can connect to a wide range of office automation, hotel management, and property management systems. When the jury visited Delta's booth during ACREX, they were impressed by Delta's Building Automation solutions and its innovative software technology and various international protocols that effectively integrate heating and cooling resources, air conditioning, ventilation, lighting, electricity, security and other building facilities." 🏆

Tata BlueScope Steel bags CIDC Vishwakarma Award

Tata BlueScope Steel Limited, one of the market leaders in the field of coated steel, steel building products and building solutions was presented "Achievement Award for Construction Health, Safety and Environment" for its Tata Steel Kalinganagar Project, Odisha by Construction Industry Development Council, a joint council between Planning Commission and the Indian construction industry.

The award was conferred to Tata BlueScope in recognition of its efforts in promoting safety, health and environment initiatives for project site at Kalinganagar, Odisha. TBSL's Building Products division, LYSGAHT was instrumental in providing design detailing, engineering and construction, support along with the supply of colour coated metal sheets for their roofing and walling requirement.

Speaking on this occasion Ajay Rattan, General Manager - Sales, Construction & Engineering (Lysaght Business), TBSL said, "It is an honour to receive this recognition for one of our prestigious projects. This is a testimony to our dedicated efforts in creating an environment that follows highest safety standards, eliminating injuries, ill health and any negative impact on the environment. Tata Steel's Kalinganagar Plant came with many challenges; such as, terse climatic conditions, over 80 metres height of installations spread across 3,500 acres, workforce availability etc. to name a few. With our stringent safety norms and practices we were able to clock 1 Million Lost Time Injury (LTI) / Medically Treated

Injury (MTI) free man hours up to till date with 80 per cent project completion."

Tata BlueScope Steel's management strategy dovetails into the company's ultimate goal of "Zero Harm"- To People, Plant and Environment. Riten Choudhury, MD, Tata BlueScope Steel further elaborating on this philosophy, said, "We take our responsibilities in the area of health and safety very seriously. 'Zero Harm' to planet, people and environment is in our DNA and is an important driver for continuous improvement in health and safety performance, across Tata BlueScope Steel. This award reiterates our capabilities in implementing world-class safety practices and processes."

On behalf of Tata Steel, Chief of RMHS and Logistics C L Karan quoted, "The job has been executed within the stipulated completion date to our satisfaction, adhering to all safety guidelines." 🏆
