

An unconventional design creation makes Valpoi Bus Stand, Goa, a travellers delight

Mention COLORBOND® or ZINCALUME® steel or LYSAGHT® profile sheets from Tata BlueScope Steel, to some of India's highly regarded architects and they respond with expressions such as "prolific and successful", "tough and endearing", "durable and long lasting", "aesthetically superior and flexible". Indeed, for the ones looking for an amalgamation of both, Beauty and Power, their words confirm that this humble sheet of Al-Zn alloy metallic coating, long lasting COLORBOND® steel paint system and profiled steel commands respect in their consciousness. The profiles made of these materials accentuate any architectural creation with modern-day streak. Especially LYSAGHT® SPANDEK® 935 is a contemporary, trapezoidal profile, making it ideal for projects which need a modern appearance. It combines strength with lightness, impact resistance, rigidity and durability. This profile is specially designed for high end infrastructure projects and public buildings and is an architect's delight!

An exemplary architect firm from Goa, Rahul Deshpande and Associates was given the task of creating a multi-utility public space in Valpoi, consisting of a Bus stand, community hall and a children's park (with jogging track). Located in the scenic backdrop of the Sahyadris, this space sprawled across 2862.0 square meter. with an architect's aspiration to capture this wonder of nature in his design. Tata BlueScope Steel supplied LYSAGHT® SPANDEK® profile made of ZINCALUME® steel for roofing, as it was their obvious choice, to set in the serenity and the misty backdrop. Mr. Rahul Deshpande opines, "It was clear to us that we required a material that we could twist, taper, slice and angle. Durability, longevity and aesthetics were uncompromising. LYSAGHT® SPANDEK® steel sheet's simplicity and versatility impressed us. The triangular exposed laterite walls masquerading as mountains in the landscape, gave a sense of direction to the visitor and his eye, being sheltered by an overpowering yet graceful metal clad roof which floats as a cloud, at times teases to express itself as a stroke of lighting." This seemingly mundane project of a regular bus stand turned into a design marvel, demonstrating the creative capacity of the skilful architect, delivering something exceptional.

About Product:

LYSAGHT® SPANDEK® profile from ZINCALUME® Steel

Profile made of:

ZINCALUME® steel, COLORBOND® XRW steel

Design Advantages

- ✓ Bold and strong appearance
- ✓ Strong cladding which can withstand high wind load, snow load or impact load
- ✓ Unique anti-capillary side-lap which makes it leak proof
- ✓ Longer Spanning capability
