

IMAGINATION

knows no boundaries

The evolution of complex structural designs has created an increasing need for superior building materials. With COLORBOND® steel, you are assured of a sustainable partner that will take your designs from concept to reality.

Colorbond®

We take pride in being at the forefront of quality and innovation, by continuously investing in research to refine and develop building materials that are stronger, lighter and ultimately more viable for construction. So, whatever your imagination conceives, COLORBOND® steel can be the material of your choice.

Contemporary Aesthetics:

COLORBOND® steel is ultimate solution for beauty and design flexibility without compromising durability. The distinctive structure surface to enhance the prestigious appearance of your building with remarkable effects.

Durability

The high strength of the base steel and the superior paint system combined with outstanding corrosion resistance from the metallic coating make it suitable for application even in harsh industrial and marine environments.

Cool Comfort

COLORBOND® steel is incorporated with THERMATECH™ solar reflectance technology, that helps reduce cooling energy consumption and offers greater thermal comfort inside the building.

Assured Performance

The legendary lifespan of COLORBOND® steel is a result of decades of performance monitoring, under various environmental conditions. Strong, secure & energy smart, COLORBOND® steel is a tried & tested product that delivers outstanding performance under severe climatic situations.

A surety of Genuineness

COLORBOND® steel is supplied with a brand mark at regular intervals on the backer coat side of the strip; an assurance of the highest quality backed by a team of qualified and experienced personnel.

Environment Friendly

The paint system of COLORBOND® steel does not contain Lead, making it a suitable option for water harvesting. Other environment friendly attributes include recyclability and reusability.
