

Ramping up health infrastructure in times of pandemic

With Smart Steel Structures from Tata BlueScope Steel

Pune, 25th May 2020

Key Highlights

To combat COVID-19, Tata BlueScope Steel announces the launch of quick, easy to install and modular life-care structures

Supplied under EZYBUILD® smart steel solutions, the company has created Hygienic Isolation Units and contactless testing & Sample collection Kiosks

All structures designed as per medical guidelines on social distancing

To address the ever-increasing demand for high quality, ready-to-install health infrastructure, Tata BlueScope Steel, leaders in coated steel, steel building products and solutions have introduced high strength, modular and quick to install steel structures which would help to combat COVID-19.

Tata BlueScope Steel has always endeavored in enabling innovative infrastructure solutions for improving lives. With its expertise and experience in such projects; EZYBUILD® the light structural steel building solutions from Tata BlueScope Steel has designed and developed customized life-care solutions in form of Isolation & Quarantine units, Testing & Sample collection booths and Doctor's Cabins.

The structures are specially designed for anyone seeking to install such facilities in their premise or locality. Be it the state government, Municipal Corporation, hospitals, corporates, institutions or even large housing societies.

While sharing his view on the given situation, Mr. Riten Choudhury, MD Tata BlueScope Steel said, "With COVID-19 pandemic, optimizing healthcare facilities for the affected is the need of the hour. Only way is to develop alternatives that are secure and quick to erect. At Tata BlueScope Steel, we are committed to fight back the virus with our easy to build and maintain structures that are designed, keeping in mind patient's comfort and healthcare worker's security."

EZYBUILD Life-care Structures

With necessary amenities as per medical guidance, these smart steel structures in form of Quarantine Wards and Testing Kiosks are available in kit-like solutions, where-in wall, roof panels and internal partitions, are assembled onsite. They can be easily dismantled, packed and shifted to other sites once the containment zone is free from the pandemic's threat. These structures are easy to sanitize, are weather-proof, thermally efficient and can be offered with or without base platform. Made from light weight high strength Colorbond and Zinalume steel; these structures offer great corrosion resistance to any chemical based discharge or sprays.

About Ezybuild

Ezybuild Solutions from Tata BlueScope Steel are ready to install, quick, customisable alternatives to conventional construction techniques. Available pan India, through a network of Ezybuild Solutions Partners; these light gauge framing structures are the best option for a speedy turnaround time, especially in times of crisis.
