COLORing lives in steel

Introducing LongLine Crimp Sheets

Benefits:

- ▶ No gutter required
- ▶ Single length in standard sheet

Material Specification					
Standard Thickness (mm) - 0.45 / 0.50 / 0.60					
Overall Length*		Option '1' (1 feet)		Option '2' (1.5 feet)	
(feet)	(mm)	Long Line Length (mm)	Crimp Curve (mm)	Long Line Length (mm)	Crimp Curve (mm)
8'	2440	2167	305	1971	750
10'	3050	2777	305	2581	750
12'	3660	3387	305	3191	750
14'	4270	3997	305	3801	750
16'	4880	4607	305	4411	750
18'	5490	5217	305	5021	750
20'	6100	5827	305	5631	750

* Sheet length in feet is approximate value

DURASHINE® LongLine Crimp Sheets

Typical Applications

Typical Sheet Arrangement

Double slope roof with crimp ridge

Double slope roof with plan ridge

Crimp ridge

Guard Film

DURASHINE® LongLine Crimp Sheets come with the added protection of the Guard Film. The film not only adds protection to the sheet during storage, handling and installation but also enables the customer to identify the DURASHINE® brand.

The guard film should be removed immediately on installation

Disclaimer on Condensation:

Condensation is the natural formation of water droplets on the bottom side of any installed metal roofing sheet. It may occur when there is a difference in temperature between the air in the building and the sheet itself, causing the water vapour (moisture) in the air to condense on the inside of the sheet. It is a natural phenomenon and hence no claims will be entertained in this regard.

The risk of condensation may be minimised by providing proper ventilation arrangement in the roofs and by using suitable insulation.

Maintenance Recommendation: Clean and maintain your roof regularly to remove dust and dirt.
