Swelect Solar, Musiri

Notre Dame Academy, Patna

Roof Top Extension

Convert your existing terrace into a utility area

- Lower weight of structure compared to RCC construction
- Structure designed to withstand heavy wind speeds
- Light weight members help easy and hassle-free construction on terrace
- Consistent and welding free connections
- Can be used as temporary spaces - dismountable structure
- High strength steel coated with ZINCALUME® steel ensures robust and corrosion resistant structure

★★★★ Accolades ★★★★★

"Nowadays it isn't about 'I will Tell-You will Do' scenarios in any sphere of workmanship and more so in case of architectural works. It has to be the prudent application of right hemisphere of the brain and altruistic execution by the workmen/project engineer/manager himself. It must serve the customer in the capacity of a 'solution'. This is exactly what makes us feel at home while working with ARK. Although we are very much 'particular' about what we expect but a judicious and elegant application of improvisation by ARK makes the actual execution delightful."

Dayanand Netalkar
Srinivas Induction Hardening

"Tata BlueScope were always there with a solution"!

Rizwan
Taj Goa Building Solution

"Having completed more than 100 buildings, advantages we have with EZYBUILD® solutions are - cost saving by use of light weight members, less labour cost and design support from Tata BlueScope Steel."

Mr. Vijay Plaha
Director, Mansarovar Products & Services

St. Agnes School, Kharagpur

Bengal Clinic, Kolkata
