

## **LYSAGHT® from Tata BlueScope Steel displays innovative architectural solutions in steel at Constro 2020**

**Pune, 16<sup>th</sup> Jan 2020**

TBSL's LYSAGHT®, manufactures and supplies roll-formed roof and wall-cladding solutions, structural products, purlins and solar mounting structures especially for the critical requirements of the B2B sector. LYSAGHT® at Constro2020 has displayed a complete range of Innovative profiles that cater to the specific requirements of building construction sector.

The exhibition is held from 16th – 19th January 2020 in Pune and will visited by top architects, consultants, builders, consumers, project owners etc. and is one of the biggest shows where new services and technologies in construction industry are displayed.

LYSGAHT® stall has been designed with an immersive customer centric approach where walk-ins can actually see cladding profiles in various shapes and forms. On display is our innovative Thermatech Technology – a solar reflectance technology that demonstrates how LYSAGHT® profiles absorb less sun's energy as compared to ordinary roofing solutions, reducing the inside temperature and overall energy consumption.

### **About LYSAGHT®**

LYSAGHT® profiles are manufactured from high strength and superior quality raw materials such as COLORBOND® steel and ZINCALUME® steel, make them an ultimate choice for rugged applications within the warehousing, infrastructure and heavy industrial segments.

The brand offers 11 roof & wall cladding profiles and 2 decking profiles to meet the varied consumer needs. LYSAGHT® range of profiles include Concealed Fixed Roofing Systems with on-site roll forming facilities, Screw-Down Roof and Wall Cladding Profiles, structural products such as decking systems and purlins as well as accessories. The brand has also introduced LYSAGHT SMARTDEK® 51, a high strength, zinc-coated structural decking system specifically developed for the Indian construction industry. SMARTDEK® 51 is used for composite floor slabs, over conventional way of casting slab, as it reduces overall completion time and project cost.

LYSAGHT® has a strong legacy of over 150 years with various applications in prestigious projects across the globe. With an expertise in construction & engineering, the brand has provided roofing solutions for more than 30 million square meters in the span of 10 years in India. A preferred choice of top architects within the country, these durable profiles offer design flexibility, thermal comfort and are available in a

wide range of aesthetically superior colour palette. LYSAGHT® profiles are available through a wide network of LYSAGHT® Solution Centre across India. LSCs are equipped to provide customers access to a wide range of superior architectural profiles, speedy responses, easy installation and also deliver re-roofing and retrofitting solutions.
